500 HF HDM CUTTER-HEAD

The 500-HF HDM is the standard Cutter-head for Heavy Duty Excavators. It Quickly Converts for Use on Skid Steers and Compact Track Loaders. SEE PIC BELOW.

OPTIONAL 2nd DRIVE MOTOR = 2X Power.

**DIMENSIONS**
- Cutting Width: 65 in. (165 cm)
- Width: 80.75 in. (205 cm)
- Depth: 34.5 in. (88 cm)
- Height: 53 in. (135 cm)
- Weight: 3842 lbs. (1742 kg)

**SPECIFICATIONS**
- No. of Teeth: 22 Teeth
- Hyd. Flow up to: 50 gpm (189 lpm)
- Oper. Pressure Up to: 6000 psi (413 bar)

**CASE DRAIN RETURN PRESSURE**
- Maximum (continuous): 43 psi (3 bar)
- Intermittent (Cold Start): 73 psi (5 bar)

The 500-HF HDM is the standard Cutter-head for Heavy Duty Excavators. It Quickly Converts for Use on Skid Steers and Compact Track Loaders. SEE PIC BELOW.

Gyro-Trac’s SABRE-TOOTH TITAN cutting technology PULVERIZES Wood into Sawdust-like Mulch. The new SABRE-TOOTH design is the NEXT GENERATION of “disruptive technology,” improving on Gyro-Trac’s Planar tooth.

It begins with a WIDER TOOTH, held in place with a WEDGED FRICITION BLOCK, taking all the force off of the single bolt. THAT’S RIGHT! Only one bolt to quickly and easily replace worn teeth.

The CONTROLLED BITE is now achieved with TWO instead of one control rib under the tooth. The distance between control ribs is wider.

The KNOCK-OUT RELIEF that reduces resistance by allowing the wood chip to curl into the relief, now has a SPLIT BLOCK strategically placed to SPLIT THE CHIP and further REDUCE the size of the wood chip. This new design creates a SELF-CLEANING effect, clearing the tooth for the next bite.

With a perfectly tuned hydraulic recipe, you can now understand how Gyro-Trac machines can mulch more wood with Less Weight, Less Energy and Less Fuel than any of our competitors. You can also understand how the smallest mulch in the business leaves behind that famous, Gyro-Trac “Park-Like effect,” and the fine, rapidly biodegradable mulch just simply Won’t Wick Fire, making a Gyro-Trac the perfect machine for cutting fire breaks.
